

Problem Statement:

**College students tend to find working with groups to be a tedious process. Finding people who are struggling with the same problems as each other is difficult and finding those who are willing to put in the effort is even more difficult. We intend to make these difficulties disappear with our app/website. Searching for peers with similar majors, levels of expertise, and willingness to work will be an ease with the utilization of our app.**

Who's experiencing the problem?

**College students looking for a study group.**

What is the problem?

**The problem is that finding a study group can sometimes be awkward, or finding the right people to work with is a challenge.**

Where does the problem present itself?

**The problem presents itself to nearly every undergraduate student, regardless of university.**

Why does it matter?

**This problem matters because students that can't find the right study group or don't know how are only hurting themselves. We want to make it as easy as possible for students to connect and find the best possible way to excel in their classes.**
